"Automate everything. Deploy anywhere. Scale infinitely."

12-WEEK CAREER PROGRAM • CLOUD & AUTOMATION

DevOps Engineer Training Program

Master Linux, Docker, Kubernetes, CI/CD & cloud platforms — build a career automating and scaling modern software systems.

12

Weeks of Training

60+

Hours of Hands-On Labs

5+

Cloud Projects

12

Company Interviews

Certificate

DevOps Engineer

Portfolio

GitHub + Live CI/CD Pipelines

Career

DevOps / SRE / Cloud Engineer

Internship

6-Month Opportunity

Why Students Choose This Program

Because the future runs on pipelines, containers, and cloud infrastructure.

- ✓ 100% Hands-On Labs — Real terminals, real servers, real cloud from Day 1
- ✓ Industry Expert Sessions — Learn from DevOps engineers at top MNCs
- ✓ Guaranteed Interviews — 12 slots with actively hiring tech companies
- ✓ Internship Pathway — Top performers get 6-month paid internship
- ✓ Portfolio Ready — Graduate with 5+ live CI/CD pipelines on GitHub

Tools & Technologies You'll Master

Linux

Docker

Kubernetes

Jenkins

GitHub Actions

Terraform

AWS

Ansible

Prometheus

Grafana

Nginx

SonarQube

PROGRAM BY THE NUMBERS

Everything You Get in 12 Weeks

We don't just teach DevOps. We build cloud-native engineers.

**FULL CURRICULUM**

12-Week Learning Roadmap

PHASE 1: Linux, Git & Scripting Foundations**Weeks 1–4**

- Wk 1** Linux Fundamentals — CLI, File System, Permissions, SSH, Bash
- Wk 2** Shell Scripting — Variables, Loops, Cron Jobs, Automation Scripts
- Wk 3** Git & GitHub — Branching, Pull Requests, Workflows, Git Actions
- Wk 4** Networking Basics — TCP/IP, DNS, HTTP, Load Balancers, Nginx

PHASE 2: Containers, CI/CD & Infrastructure as Code**Weeks 5–8**

- Wk 5** Docker — Images, Containers, Compose, Volumes, Networking
- Wk 6** CI/CD Pipelines — Jenkins, GitHub Actions, Build & Deploy Flows
- Wk 7** Kubernetes — Pods, Deployments, Services, Ingress, Helm Charts
- Wk 8** Terraform & Ansible — IaC, Provisioning, Config Management

PHASE 3: Cloud, Monitoring & Production Systems**Weeks 9–12**

- Wk 9** AWS Core — EC2, S3, RDS, IAM, VPC, Lambda, CloudWatch
- Wk 10** Monitoring & Logging — Prometheus, Grafana, ELK Stack, Alerts
- Wk 11** Security & DevSecOps — SonarQube, Trivy, Vault, SSL/TLS
- Wk 12** Capstone Project — Full Pipeline Deploy on AWS, Code Review

Every week includes live lab sessions, assignments & mentor feedback

"You build it, you run it, you ship it." — The DevOps Way

EXPERT SEMINARS

4 Exclusive Industry Expert Sessions

1	DevOps Culture at Scale How top companies ship 1000x/day	Week 3
2	Career in DevOps & Cloud Salaries, certs & growth paths	Week 6
3	Kubernetes & Cloud Architecture Production-grade infra design	Week 9
4	DevSecOps & SRE Best Practices Security, SLAs & incident response	Week 12

GUARANTEED INTERVIEWS

12 Direct Company Interviews

- ✓ 12 interview slots with product companies, startups & MNCs
- ✓ Technical mock interview prep — Linux, Docker, K8s, CI/CD
- ✓ Resume & GitHub profile review by professionals
- ✓ Direct feedback from hiring DevOps engineers
- ✓ Companies: SaaS startups, cloud-native firms & MNCs

CERTIFICATION & INTERNSHIP

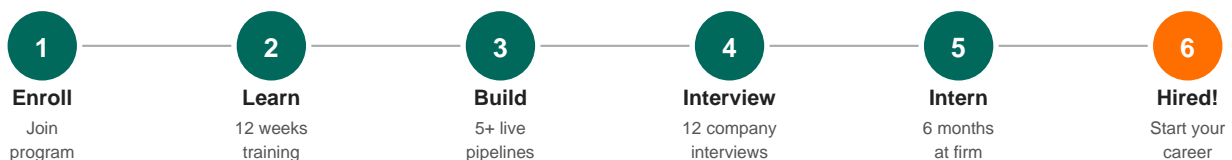

CERTIFICATE OF COMPLETION

- DevOps Engineer Certification
- Issued by Skill Shiksha
- Verifiable & Industry-Recognized
- Add to LinkedIn & resume

6-MONTH INTERNSHIP

- Intern at Skill Shiksha
- Work on live cloud & infra projects
- Mentored by senior DevOps engineers
- Stipend-based opportunity
- Letter of recommendation

"Deployed a full K8s cluster on AWS in Week 10 — mindblown."
— **Vikram R.**

"Got a DevOps role at a unicorn startup right after graduating."
— **Sarika M.**

"The CI/CD pipeline project is what got me hired."
— **Arun T.**

FREQUENTLY ASKED QUESTIONS

Do I need coding experience?

Basic Linux & programming awareness helps. We cover all fundamentals from Week 1.

What if I miss a class?

All sessions recorded. Lifetime access to lab environments & recordings.

Is the internship guaranteed?

Top performers get a 6-month paid internship at Skill Shiksha.

Which cloud platform will I learn?

Primarily AWS. Concepts apply to Azure & GCP as well.
